Supplementary Sheet for 25th Anniversary Female Sale dated 16.4.14 [click here](#)

Kenny's Creek celebrates it's 25 year birthday next year and this, combined with the reality that we have grown the Angus herd book proportion of our stud dramatically over the past five years, has encouraged us to be bold and sell all of our HBR females over the age of three years.

This includes all special purchase females that have been used as donors in the stud and is a "without exception" sale. In all, the sale team includes 30 donors and totals approximately 275 females. It includes the female progeny from our alliance with Finks Beef Genetics (USA) and Fossil Creek (NZ).

Part of the background to bringing us to this decision is the fact that over the past five years we have been involved in a substantial embryo program and have produced and calved down over 1,500 ET calves. This was undertaken to supplement our own and contract programs and has meant that we have expanded dramatically the female portion of our herd. Not only have we expanded the HBR numbers of the herd but we have also changed the age demographics of the herd and consequently it is time to face reality and reduce the size of the herd.

Over our 25 years of operation we have had regular sales of HBR females and during these sales we have always endeavoured to place quality females into the Angus fraternity. We have found both practical virtue and satisfaction in seeing some of our eminent dams emerge in other studs' breeding programs. It is this level of satisfaction, seeing our females used productively by others, which underpins much of our motivation on this occasion.

However this sale is different to all others and is unequivocal and ruthless in selling all donors, both internal and external acquired, and all their female progeny over the age of three years. Some of the specials in the Sale include:

Due to calve in the Spring, 2014:

- 75 PTIC F cows
- 39 PTIC E cows
- 20 PTIC D cows

- 19 PTIC C cows

The group has 13 donors including Te Mania V254 and NDI B43 out of the Finks Miss Cow;

Due to calve in the Autumn, 2014, and to be sold with calves at foot:

- 43 F cows
- 16 E cows
- 6 D cows

The group has 17 donors including Vermont Dream E158, one of the females still active from the USA 2700 x CCVY301 flush, other donors collectively account for 103 progeny.

The sale is scheduled for 1<sup>st</sup> May 2014 and will be preceded the day before by the Annual Southern Slopes Angus Sale which will, in turn, be followed by our Autumn Bull Sale. To make the Bull Sale more interesting we will also be selecting a number of retained stud sires to put in the sale.

We have never been in the position to promote a female sale with such integrity as this particular sale and would welcome any private inspections of the females. We plan to have on show the sale females the day before the scheduled sale on 1<sup>st</sup> May 2014. All of us in the Kenny's Creek team look forward to providing any assistance that you would find helpful in understanding the females that we are placing up for sale. It is our ambition to have an electronic catalogue up on the Angus website before Christmas and that will include videos of a number of the key and indicative lots.

I encourage you to review our breeding objectives on this website to understand properly the rigorous and independent approach that underpins our breeding philosophy.

All of the Kenny's Creek Team will be available to do anything we can to assist in helping you understand the quality of what we are putting before you.

Nick Burton Taylor
